3 Gears Speed Switch

Switch gears by pushing the button to experience the thrill of 'riding' easily and quickly in the sea.

Free model: 1m/s(2.24mph)

Sport model: 1.5m/s(3.36mph)

Turbo model: 2 m/s (4.47 mph)

60 Minutes Battery Life

Battery life lasts for 60 minutes in regular use.

Dive Deep

Navbow adopts the industry-leading sealing technology that ensures working depth of 40 meters(131ft).

One-Handed Operation

The one-handed operation mode provides the opportunity to professionals who can dive deeper with a D-ring buckle and a single hand operation lanyard to connect the body to the Navbow.

OLED Display

The OLED screen displays the speed gear, battery life and hand operation mode.

Customize Your Photographic Base Plate

Navbow is able to mount a base plate where you can customize your professional equipment, such as action cameras, waterproof LED light, float arm, etc.

Low Battery Alert

Navbow will vibrate when the battery declines to 30%.

Speed	Free: 1 m/s (2.24 mph), Sport: 1.5 m/s (3.36 mph), Turbo: 2 m/s (4.47 mph) *
Depth	40 m (131 ft)
Battery life	60 minutes *
Noise	≤ 60 dB
Interface	two ¼"-20 mounts
Accessories(included)	Balance weights D-ring buckle Single hand operation lanyard Anti-lost lanyard
Optional accessories	Fast charger Photographic base plate Diving cross strap Waterproof backpack

* The rated speed is the result of product test results and may be affected by user, user's swimwear and equipment, water conditions, etc.

* Battery life is for reference and based on product test data. It is the average value of the maximum time that the user can operate the scooter according to general usage (discontinuous operation) when the battery is fully charged.

* The scooter is designed for users 16+ years old. Minors must be accompanied by a parent or guardian while using the scooter.

A diver is shown underwater, holding a large, professional-looking camera. The diver is wearing a mask and fins. The water is clear and blue, with sunlight filtering through from above, creating a shimmering effect on the diver's skin and the water's surface. The camera is the central focus, held in both hands. The diver's body is angled towards the right of the frame.
